

POLYCOM VTX 1000, REVOLABS SINGLE CHANNEL SOLUTION

CONNECTING THE VTX 1000 INPUTS AND OUTPUTS

1. Connect the Line Output of the Solo Single Channel to the VTX 1000 input as shown below using the included cable.

2. On the SoundStation VTX 1000 press the MENU key and select the AUDIO SETUP sub-menu to confirm that AUDIO INPUT is set to POLYCOM WIRELESS MICROPHONE, and then select SAVE.
3. Press the PHONE BUTTON. You should hear a dial tone in the room if the interface module is connected to an analog telephone line.
4. Dial a telephone number via the Keypad.
5. Use the VOLUME UP and DOWN buttons to control the far end volume.
6. Use the MUTE button to mute the local audio to the far end. The MUTE button does not affect the far end audio into the local room.
