## 4 OR 8 CHANNEL WIRELESS AUDIO SOLUTION

### FOR MID- TO LARGE-SIZE CONFERENCE ROOMS

As a GSA listed manufacturer, Revolabs Fusion™ is the complete wireless audio solution for mid- to- large -size conference rooms where installed audio equipment is not available. Revolabs Fusion combines the wireless receiver for the microphones with a digital signal processor, audio mixer, and Acoustic Echo Cancellation and Noise Reduction technology.

Revolabs Fusion provides all the connectors required for connectivity between speakers or amplifiers in the room. **Revolabs Fusion can also be directly connected to most major video conferencing solutions in the field, such as Lifesize, Polycom, Sony and Tandberg,** making it the ideal wireless unified communication solution for conference rooms.

**The Revolabs Fusion comes in a four or an eight microphone version, making it versatile to cover the audio needs of mid-to large-size conference rooms.**

To enable telephone conferences, **Revolabs Fusion includes a telephone line-in connector that plugs in directly to a telephone network as a conference phone.** It also provides a telephone set connection, allowing users to plug a desktop phone in for non-speaker calls. The Revolabs Fusion wireless dialer enables users to set up calls from anywhere in the conference room.

All wireless communication between the microphones and the Revolabs Fusion is digitally encrypted using 128-bit encryption technology, securing the communication and preventing unwanted listeners from listening in.

**Rechargeable batteries in the microphones, which provide up to eight hours of talk time with a two-hour recharge time.** With this wireless solution, Enterprise users can finally move around their conference room, and still be heard!

01-08FUSION-62-3Y	\$8,994
Fusion 8-channel Telephony Hybrid and Wireless Microphone System- remote control, 2 power cords, manual, 6 omni tabletop mics, 2 lapel mics, 3 Year Gold Service Plan

Fusion 4-channel Telephony Hybrid and Wireless Microphone System - remote control, Tabletop Dialer, 2 power cords, manual, 3 omni tabletop mics, 1 lapel mic, 3 year Gold Service Plan	

## BENEFITS

### Superior Audio Quality

Wideband frequency response provides high definition audio delivering spoken word clarity

### Wireless Freedom

Lets you sit anywhere within a conference room or walk around freely

### Support for Multiple Microphones

Wearable, tabletop boundary and handheld

### No More Cell Phone Buzz

RF Armor™ technology lets microphones operate even when in direct contact with other wireless electronic devices

### Secure

Tamper proof screws and case, and 128-bit encryption prevents people from listening in

AUDIO	Channels	4 or 8 channels per system
	Radio Frequency Range	North and South America: 1920 to 1930 MHz 100 feet (30 meters) approx. (no obstruction) Out-of-range alarm
